Ref. No. ISO 3948-1977 (E)

Descriptors : shipbuilding, inland navigation, pipelines, compressed-air circuits, pressure.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 3948 was developed by Technical Committee ISO/TC 8, *Shipbuilding*, and was circulated to the member bodies in August 1975.

It has been approved by the member bodies of the following countries:

| | | |
|----------------|------------------------|----------------|
| Austria | Ireland | Romania |
| Belgium | Italy | Turkey |
| Bulgaria | Japan | United Kingdom |
| Czechoslovakia | Korea, Dem. P. Rep. of | U.S.S.R. |
| France | Netherlands | Yugoslavia |
| Germany | Poland | |

No member body expressed disapproval of the document.

INTERNATIONAL STANDARD ISO 3948-1977 (E)

AMENDMENT SLIP

Published 1977-11-01

Shipbuilding — Inland vessels — Compressed-air systems — Pressure ranges

MODIFICATION TO FOREWORD (*Inside front cover*)

The ISO member body for Hungary has now approved this International Standard. Hungary should therefore be included in the list of countries whose member bodies have approved the document.
